

## **News Seed Encrusting**

### **New Technical Brochure: Seed Encrusting with KURARAY POVAL™**

Discover how seed encrusting can significantly improve the efficacy and success of your planting efforts. Our latest **technical brochure** dives into this innovative technique, where a protective layer is applied to seeds to improve handling and performance.

Download the brochure to explore:

- How seed encrusting improves efficacy and planting success
- The impact of molecular weight and the degree of hydrolysis on binding
- How KURARAY POVAL™ can be utilized in the binding process

Learn more about the benefits of seed encrusting and the role of **KURARAY POVAL™**, a **high-quality Polyvinyl Alcohol (PVOH)**, in ensuring high binding strength.
