

Kuraray at Euroseeds Congress 2025

Kuraray will join the **Euroseeds Congress 2025**, taking place in **Edinburgh, Scotland, from October 19–22, 2025**. The annual congress is a key meeting point for the European and international seed sector, bringing together experts and decision-makers to shape the future of agriculture.

At **booth nr. 9**, Kuraray will highlight the benefits of **KURARAY POVAL™ (Polyvinyl alcohol) solutions for agriculture**. Our product range includes grades that are **inherently biodegradable in water/soil in aqueous solution form, BPI Certified and OMRI Listed® and ideal for applications such as seed coating, soil improver, spray adjuvant, biostimulants and fertilizer binder**

With its outstanding film-forming, binding, and protective properties, KURARAY POVAL™ helps improve seed performance while supporting more sustainable farming practices.

Kuraray looks forward to engaging with customers and partners, sharing expertise, and supporting the industry's goals for sustainable growth.

If you would like to schedule an appointment with our experts during the event, please contact us via our contact form ([Contact form](#) | [Contact now](#))

Visit us in Edinburgh to discover how KURARAY POVAL™ can add value to your seed coating innovations.
