Kuraray at in-cosmetics 2026 in Paris

Sub headline:

Kuraray's Poval Resin Division and the Isoprene Chemical Division will jointly present their portfolio at **in-cosmetics Global 2026**, taking place **April 14–16 in Paris, France**.

Text:

As one of the leading international events for cosmetic ingredients, [in-cosmetics Global](#) offers a platform where formulators, suppliers, and industry specialists explore technologies and trends in the beauty sector.

At this year's edition, Kuraray will highlight key products developed to enable high-performance and efficient solutions:

KURARAY POVAL™ LV is designed for personal care formulations, offering key functionalities such as encapsulation, film forming, and viscosity control. These polyvinyl alcohols (PVOH) are ultra-low in methanol, inherently biodegradable, and water-soluble, making them well suited for a wide range of skin care and beauty applications. Their strong adhesion-promoting properties ensure excellent performance in products such as peel-off masks, mascaras, sunscreens, and shampoos.

Isopentyldiol (IPD) is a multifunctional ingredient that delivers good performance while helping reduce formulation complexity. It contributes to a silky skin feel, supports hair repair, and enhances solubilization. In addition, IPD enables ethanol-free, long-lasting fragrance mists and supports shorter INCI lists.

Meet Kuraray at in-cosmetics 2026!

We invite you to visit us at **Booth 2L80K** to discover our products and speak directly with our experts.
