

**Kuraray Poval™**

## **KURARAY POVAL at PVC 2021**

Hattersheim, 29.04.2021

Kuraray are pleased to announce that they will be present at this year's world leading forum on polyvinyl chloride, PVC 2021. This event was postponed for one year due to the covid pandemic and will now take place as a virtual event from the 10th -12th May. The conference is a triennial conference delivering a comprehensive and varied programme of papers covering over 60 topics across 7 topic streams.

Unfortunately this year we will not be able to meet our visitors in person. We would however be happy for you to visit our virtual KURARAY POVAL™ booth to discuss any topics related to our polyvinyl alcohol suspending agents for vinyl chloride polymerisation.
